Product description

The Dräger **X-plore 6530** meets the highest demands in terms of quality, reliability and safety. It is a class 3 respiratory protection mask equipped with an Rd40 connector conforming to the EN 148-1 standard and compatible with RD DIN40 universal filter cartridges.

The double three-lip seal offers reliable protection and a secure fit, suitable for almost any body type. The resistant EPDM elastomer mask body ensures excellent comfort even in case of prolonged wear.

► Five-point clamp

The comfortable 5-point attachment strap not only ensures quick on and off, but is also wide enough to not put pressure on the user's head.

► Wide field of view

Equipped with a no distortion 180° viewing angle, the visor guarantees a wide field of vision and excellent peripheral vision. The **X-plore 6530** full face mask is available in two versions:

- Impact resistant polycarbonate visor (with plastic or stainless steel frame)
- Anti-scratch and highly resistant to chemicals Triplex glass visor (with stainless steel frame)

► Efficient ventilation system

The ventilation system is particularly efficient thanks to an independent inner mask, preventing any fogging formation on the visor and ensuring a clear view.

► Clear voice communication

An integrated stainless steel voice diaphragm eases communication.

► EN136 Class 3 certification

The **X-plore 6530** full face mask is EN136 Class 3 approved, the highest level of safety with increased resistance to thermal radiation.
