Pack & GO safety harness with integrated bag / PAD	NUS57P

Product description

The **Pack & GO** is a safety harness with an integrated carrying bag. It is comfortable to wear and its integrated storage bag makes it particularly practical. It has 2 attachment points : 1 sternal point on textile loop and 1 dorsal point on "D" metallic. It complies with the EN361 standard (PPE against falls from a height).

The **Pack & GO** fall arrest harness innovates with its anti-trauma buckles at the thighs which reduce the stress on the wearer produced during a fall (compression of the femoral artery). It is equipped with automatic buckles on the thigh and chest boots. Available in 3 sizes, it is easy to adjust using flat buckles on the shoulder straps for an adjustment by pulling down. It is also equipped with a fall indicator.

The **Pack & GO** is an excellent value for money safety harness, suitable for the industrial maintenance and the construction sectors. It is a French-made product that offers a guarantee of quality, short lead times and compliance with French and international standards, an undeniable advantage.
